Allowable Subject Matter

1. Claims 1-7, 9-17, 19 and 20 are allowed.
2. The following is an examiner's statement of reasons for allowance:

One of the closest prior arts, Schein of the record teaches EPG (as shown in figure 4A) having at least one display window (128 or 126) and a grid guide (next to display windows 126 and 128), the grid guide including a plurality of program titled cells displayed on screen, and displaying a video clip preview in the at least one display window (i.e., 128). Schein further teaches that the display window 128 can be for displaying a short preview of the show that its program title cell is currently being highlighted in the grid guide. Bruette of the record teaches that a program guide indicates, by the use of icons, where a given program/channel has been restricted from viewing. Schein and Bruette, either singularly or in combination, fail to anticipate or render the following limitations obvious: "wherein the launching of the video clip preview is inhibited if a program corresponding to the video clip preview and corresponding to the highlighted program titled cell is restricted according to a user profile based parental control" as recited in claim 1, "wherein the display of the video clip preview is inhibited if a program corresponding to the video clip preview and corresponding to the highlighted program titled cell is restricted according to a user profile based parental control" as recited in claim 10.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
